

Vehicle Modifications List

The Drive Smart Modified Vehicle Package

1) Driving Aids

The Drive Smart Corolla is fitted with a variety of aids, controls and systems enabling drivers to explore safe driving options and possibilities.

2) Driving Instructor Support

Driving OT assessments, driving lessons and licence assessments are available in the modified driver training vehicle. A Specialised Driving Instructor comes as part of the package.

All controls can be installed or removed as needed for each client. Systems can be turned on or off as required. We can start with a standard car and work up to a combination of driving aids and control systems to suit client specific needs.

Equipment Details

- **Brake lever with electronic accelerator** trigger and toggle (Fadiel FSK2005)

- Available **Right-hand** side
- Electronic accelerator makes driving more natural
